

Senior Cloud Engineer – 3 month contract

The Company

The Foundry is a world leading innovator of creative software across multiple industries. Founded in 1996, we are an award-winning, exciting, dynamic company. As well as being proud of our software, we believe the strong relationships with our customers allow us to develop flexible, open, problem-solving applications that span VFX, design, and more. We continue to move from strength to strength and are looking to grow our team of bright, capable, hard-working, and fun experts.

The Role

As a Cloud Engineer at The Foundry, you will contribute to our projects by writing code alongside our designers and researchers to ideate, iterate, interact, and experiment with our ideas for extending our tech portfolio into the cloud. You'll need a thorough knowledge of the developing, and delivering scalable, cloud-based, solutions quickly and efficiently from the back end through to user interfaces to deliver usable prototypes. You'll be able to manage expectation, having built similar services previously, as to what is possible at this initial stage of the project, helping us build an ecosystem which can be developed into fully fledged products and services.

The requirements

- Javascript - Node.js experience, with deep understanding of the language (including some front end skills, e.g. Angular.js, bootstrap)
- Large scale data knowledge; experience the different database technologies (e.g. SQL/nosql), and how to make them efficient and scalable.
- AWS knowledge - must have delivered web apps based on AWS previously, with knowledge of the different services in that portfolio.
- Adept at engineering prototypes to allow rapid feedback and iteration, working with designers to develop ideas and concepts into reality.
- Excellent knowledge of relevant development tools, frameworks, and processes.
- Good communication skills, organization, and time management.

Applying

If you meet the criteria, are eligible to work and are interested, please send your covering letter, CV, salary expectations and notice period to jobs@thefoundry.co.uk with the subject "Senior Cloud Engineer".

More About Us.

The Foundry, established in 1996, is renowned for our solutions, our customer-centric focus and our collaborative approach to development. The Foundry, with more than 270 employees worldwide, is led by CEO Bill Collis and is backed by HgCapital.

The Foundry develops award-winning software used globally by creative professionals. The portfolio lets users create inspiring and technical high-end visuals in the areas of Media Production (film, commercial, episodic, gaming), and Design, as well as participate in emerging high-growth markets such as Virtual/Augmented Reality and 3D printing.

We develop solutions and grow our market through a combination of build, buy, partner. Our R&D team has created a number of award-winning solutions. Also, we've participated in numerous funded projects, both from the UK, as well as the European Union, that sees us work with leaders across industry to develop offerings. In some cases, we've worked customers to help develop a specific solution and then commercialize the solution for broader market adoption. Finally, we merged with Luxology, the creators of MODO in 2012 and in 2014, acquired Made With Mischief.
